TECHNICAL SPECIFICATION

Reload No.10 - Concentrated Washing Up Liquid (ST/65)

Active concentrated detergent designed for handwashing and high volume dishwashing in sinks. Can also be used as a general purpose detergent. This product contains an anionic blend of surfactants, paraffin sulphonate and Lauryl ether sulphate, inorganic viscosity modifiers, preservative and water-soluble dyes.

Features:

- Produces a long lasting, high, stable foam.
- Breaks down fats, proteins and carbohydrates from dishes fast and effectively making it suitable for use in busy food handling and preparation areas.
- Grease in dish water is held in suspension preventing it from deposition onto dishes.
- Provides excellent wetting, cleaning and foaming properties.
- Surfactants used are biodegradable and phosphate free.
- Effective in both hard and soft water areas.

PROPERTIES

Appearance @ 20°C
pH (neat)
Odour
Specific Gravity @ 20°C
Flammability

SPECIFICATION

Dark Green, Clear Viscous Liquid
8
Floral
1.050
Non-Flammable

DIRECTIONS FOR USE:

- * Use through Kitchenmaster Super C or Smart Pump dispenser.
- * One push per sink i.e. 67-100 sinks per 2Lt.

STORAGE:

Store in original container and protect from extremes of temperature.
Store well away from other cleaning chemicals particularly those which are alkaline.
Do not store in direct sunlight nor allow the product to freeze.
Shelf life (in unopened original container) is a minimum of 18 months.

Safety Advice:

This product is classified as IRRITANT under CHIP regulations.
Avoid contact with eyes. In case of contact with eyes or skin rinse immediately with plenty of water and seek medical advice.

Pack Sizes:

4x2Lt case (76 cases pallet).

Super C Dispenser Features Include:

Unlike some systems where water pressure and temperature can alter the dosage, the Super C dispensing system is highly accurate every time, resulting in control of cost and elimination of waste. No electrical or water connections are required. The dispenser can be installed in a matter of minutes. A measured dosage is already factory set. Each dispenser can be re-calibrated, if required, and is supplied with reset keys and instructions:

Set Dosages: The concentrated product is dispensed one shot at a time, with the lever having a time delay mechanism. Employees are therefore prevented from over using or wasting product.

Easy to use: First you add the water to: trigger, sink or bucket, depending on your application. Then add one shot of measured concentrate from the appropriate dispenser.

Safety in use: The dispensers are elevated off the floor and are fully lockable. A special dispenser master key can be issued to the manager or supervisor for product replacement and priming.

Reduced storage: Storage needs are dramatically reduced, leaving you to free up valuable space.

Smart Pump Dispenser Features include:

A chemical dispensing system allows concentrate chemicals to be diluted at point of use. Smart Pump requires no water or electricity for installation or operation. Avoids all the problems associated with some systems, which include: insufficient water pressure, limescale and other in-line deposits all of which contribute to inaccurate dosing. An economical, reliable and user-friendly system to allow concentrated chemicals to be dispensed into small and large containers.

Main Features:

- Quick and easy installation.
- Easy to use.
- Stand alone system.
- Space saving.
- Single or multiple chemical.
- Robust dispenser.
- Lockable wire rack for chemical containers.
- System allows additional units to be added to the existing installation.
- Dispensers are for sink, bottle or bucket use.
